---

Thanks for your interest in SIMLAB ( <http://simlab.jrc.ec.europa.eu/>).

The serial number for version 2.2 is:

2zzkxHVJD2

The manual, with all the hints on SIMLAB, is online. SIMLAB includes the most recent variance-based methods and screening methods for sensitivity analysis, whilst other packages perform only very simple (regression-correlation) analyses.

We maintain an email list and you will be notified about any new release.

You might be interested in our new book entitled: "Sensitivity analysis in Practice", which builds on SIMLAB:  
<http://farmweb.jrc.ec.europa.eu/ESAF/Publications/Books/SensitivityAnalysisInPractice2004.htm>

If you will use SIMLAB in your work, please acknowledge its use in all your publications (reports, articles, etc.) with the following reference:

SIMLAB (2004) Version 2.2 Simulation Environment for Uncertainty and Sensitivity Analysis, developed by the Joint Research Centre of the European Commission.

Kind Regards,  
The SimLab Team
