

Eban Bean earned his PhD degree in August 2010. Dr. Bean was a unique member of the research team, where he focused on research areas indirectly related to irrigation such as infiltration, stormwater runoff, and low impact development (LID). After graduation, Dr. Bean joined the private sector by accepting a position at Geosyntec Consultants based in Kennesaw, GA where he continues to work as a water resources engineer in the area of storm water treatment. He can be reached at ebean@geosyntec.com.
