Florida AgrAbility

Cultivating Accessible Agriculture

Who are we?

Florida AgrAbility is a collaborative effort between the University of Florida IFAS Extension and the Center for Independent Living of North Central Florida (CILNCF) that helps farmers, ranchers, and agricultural workers overcome barriers caused by injuries, disabilities, and health conditions. Sponsored by the U.S. Department of Agriculture (USDA), Florida AgrAbility offers support to agricultural workers and their families, enabling them to continue farming independently and safely.

Whom do we serve?

Floridians with a disability or long-term health condition who reside on a farm/ranch, or who are engaged in farming, fishing, or forestry may be eligible for AgrAbility services.

What do we do?

Conduct worksite assessments to identify barriers to completing tasks both in the agriculture workplace at home

Make recommendations for overcoming disability-related limitations including assistive technologies, modified work practices, & other possible solutions

Provide educational materials and training opportunities (in-person & online)

Provide access to resources and informational materials

*Florida AgrAbility does not provide direct funding
